

From Attention to Revenue

How Salespaddi is building the Revenue Operating System for African businesses

EVERY CUSTOMER INTERACTION SHOULD BECOME MEASURABLE REVENUE.

EVERY CUSTOMER INTERACTION SHOULD BECOME A MEASURABLE REVENUE

VISION

To become the revenue operating system powering every grain business across Africa, where customer interaction becomes measurable revenue.

MISSION

We exist to eliminate revenue leakage by helping African businesses turn every customer interaction into measurable growth through one intelligent platform.

Mega Ifiok — Founder, Salespaddi

Software Engineer building Salespaddi product, engineering, and go-to-market. Also runs Outgridlabs, an AI automation agency, and is a Computer Science student at MIVA Open University.

Unwana Ekere — Co-founder, Salespaddi

Technical Co-founder and software Engineer contributing to Salespaddi's engineering team alongside managing the team and also Building out core product functionality.

Wisdom Etim — Finance / Ops

Brings a finance and banking background to structure Salespaddi's cap table, pricing, and financial operations as the company scales towards institutional investment.

Joy Umoren — Go-To-Market

Drives Salespaddi's positioning and customer acquisition strategy for African SMBs, coaches and course creators, translating product capability into market traction

Businesses don't have a marketing problem. They have a revenue execution problem.

Every day, businesses successfully attract customers but lose them between interest and payment.
The gap between curiosity and conversion is where revenue disappears.

A FAMILIAR STORY

300 people signed up. 15 became customers.

This is what happens inside a typical webinar funnel today for a course creator, a coach, or an SME running a live sales event.

300

Webinar registrations

200

Attendees show up

40

Ready to buy

15

Become customers

25 lost opportunities. Sales don't disappear because people aren't interested they disappear because businesses lack an integrated revenue system to catch them at the moment of decision.

Introducing Salespaddi

The Revenue Operating System for African businesses

Target Customers

Marketers, Course Creators, Coaches, SMEs.

One Platform. One Customer Journey. One Revenue Engine.

THE INSIGHT

One host can't close 400 people. Our AI can, all at once.

While you present live on stage, Salespaddi's AI voice agent quietly pulls every interested attendee into a private 1:1 room and closes them in parallel, not one at a time.

All rooms run simultaneously, not one after another.

6

AI 1:1 Closing

Checkout & payment

7

CRM

Lead becomes customer

8

Analytics

Revenue dashboard updates

Financials & Financial Projections

How the revenue engine translates into SalesPaddi's own numbers.

Revenue Assumptions

Blended ARPU of ~~₹45k~~₹55k/mo per active customer (60% Starter / 30% Growth / 10% Pro-Enterprise), plus usage fees and a 3% embedded-payments take rate.

Expenditure Assumptions

Core costs: AI/LLM + voice usage (Vapi), cloud hosting, payment processing fees, and a lean founding team through Year 1.

Profitability Outlook

Gross-margin positive per customer from month one; company-level breakeven targeted once paid customers cross ~400 active accounts.

Year 1 Revenue Ramp (₹ millions, illustrative)

3-Year Outlook: Yr1 → Yr3 growth driven by waitlist conversion (500+ SMEs), embedded-payments volume, and Enterprise plan uptake as SME customers scale.

Business Model Canvas

A Sustainable Business Model

Salespaddi's revenue grows in lockstep with our customers. As they scale, so do we — creating a naturally compounding business.

01	02	03	04	05
SaaS Subscription	Premium AI Features	Webinar Hosting	Embedded Payments	Enterprise Plans
Monthly platform access	AI closing minutes, add-ons	Usage-based hosting fees	Take rate on checkout volume	Custom pricing for larger teams
₦15k – ₦120k/mo	~ ₦ 150/min bundled	+ ₦ 5k / 100 attendees	+3% platform fee	From ₦300k/mo

Illustrative pricing - validate against real Vapi/LLM usage costs before finalizing. Blended ARPU estimate: ~~₦~~45,000–~~₦~~55,000/mo per active customer, assuming a 60% Starter / 30% Growth / 10% Pro-Enterprise mix. Embedded payments: SalesPaddi's proposed 3% platform fee sits on top of the total embedded payments the customer sees one blended rate at checkout.

Risks and Mitigation

What are the odds, and how do we intend to beat them?

Risk	Why it matters	Mitigation	Owner
AI closing adoption	Businesses may distrust an AI agent closing sales on their behalf.	Host stays visible/in-loop; AI escalates to human for high-value or hesitant leads.	Product
Payment infrastructure reliability	Failed or delayed checkouts at the moment of decision kill conversion.	Multiple payment rails + Wema embedded-finance partnership for redundancy.	Eng / Wema
Customer acquisition cost	Coaches/SMEs are price-sensitive and hard to reach at scale.	Waitlist-led, community-driven GTM; Wema distribution into existing SME base.	GTM
Competitive response	Global webinar/CRM tools could bundle similar AI features.	Africa-first focus: local payments, WhatsApp-native, Naira pricing as moat.	Founder
Data privacy & compliance	Handling customer payment and personal data across a regulated market.	NDPR-aligned data handling; compliance support via banking partnership.	Ops / Wema

Why Now?

Three forces are converging to reshape how African businesses operate creating urgent need for integrated revenue platforms.

1

AI is Democratizing Scale

Small businesses can now automate what once required large teams from outreach to follow-up.

2

Digital Commerce is Accelerating

African consumers are transacting online at unprecedented speed. Businesses must be ready to capture demand.

3

SMEs Are Ready to Scale

Growing businesses need integrated platforms not disconnected tools that create operational gaps.

WHERE WE ARE TODAY

Early and building real demand before launch.

Salespaddi is pre-launch. Rather than guess at demand, we're building a waitlist of businesses who feel this problem today coaches, course creators, and SMEs running webinars and live sales events.

WAITLIST

500+

CORE PLATFORM

Built & functional webinars, CRM, AI closing, payments

TARGET LAUNCH

1st October, 2026

Why this matters for Wema: a waitlist of underserved SMEs is a pipeline for banking products, embedded payments, and capital access, before a competitor gets there first.

THANK

YOU
